ELEVATING THINKING WITH AI IN IB LEARNING

Aligning Bloom's Taxonomy with ATL Skills

ALIGNMENT

CREATE The Architect	**Communication Thinking**	Use AI as a brainstorming partner to spark ***Creative Thinking***, then use ***Communication skills*** to draft the final original product, ensuring your unique voice remains dominant.
EVALUATE The Judge	**Self-Management**	Exercise ***Self-management*** (Integrity and Affective skills) to resist the urge to copy-paste, instead using the AI to challenge your arguments and evaluating its feedback ethically.
ANALYZE The Investigator	**Thinking Research**	Use ***Research skills*** (Media Literacy) to deconstruct why the AI generated a specific answer, and apply ***Critical Thinking*** to identify patterns or bias in the AI's output.
APPLY The Pilot	**Social Thinking**	Treat the AI as a role-play partner (***Social skills***) to simulate real-world scenarios, then use ***Thinking skills*** to transfer your knowledge to solve the specific problem presented.
UNDERSTAND The Translator	**Communication**	Use AI to simplify complex texts or translate terms, then rewrite the explanation in your own voice to demonstrate genuine ***Communication*** and understanding.
REMEMBER The Curator	**Research**	Use AI as a search engine to retrieve facts, but apply ***Research skills*** to verify accuracy against textbooks, preventing "hallucinations."
